The KVM Switch Kit is ideal for controlling two PC's in the same working environment. The KVM Switch Kit saves you a lot of space, because it enables you to operate two PC's with one single monitor, keyboard and mouse. Thus you can control, for example, a printer server, a backup system and an internet server without leaving your workstation. The system gets switched on automatically when you start your PC, or you can activate it via a combination of keys on a keyboard, or you may activate it manually over the KVM Switch Kit.
